

Your legacy and future can live in harmony.

To take advantage of new business opportunities and new technology options, you don't have to discard the power and functionality of your green-screen 5250 applications.

Amaze your users with a brand new look-and-feel and with a modern, simpler way to navigate through your current 5250 applications – without changing any code. All through the power of LANSAs RAMP technology.

LANSAs RAMP technology lets you isolate and encapsulate the valuable portions of your legacy applications and repurpose them inside LANSAs modern application framework that can be deployed as a rich-client and/or browser application.

Then you can progressively extend application functionality with email, video, voice, desktop integration or Web interfaces and other technologies without disruption to your business and customers – all using LANSAs.

Discover what other companies have to say about their experiences using RAMP to improve and extend their legacy systems at www.lansaramp.com/customers.htm

Your Legacy is Your Asset.
